Hi Catherine, thanks so much. What's the EPA Reg # for the product? That may be helpful for us to include too. I'll run this language by Allison Dennis prior to sending. Thank you again!

Best,
Nicole

Hi Nicole: I'm not sure if folks want to provide this level of detail, but maybe something like,

Ex. 5 Deliberative Process (DP)

Best,
Catherine

Hi Catherine, TGIF!

Rhina Lara recommended I connect with you on this question re: PFAS in packaging. Is there some additional info we can offer? Below is standard info we've been sharing. I'll share the info you provide with Allison Dennis, OCSPP comms director, who is working with OPA on managing the comms re: PFAS in packaging.

As always, many thanks for your help!

Best,
Nicole

Thank you for contacting the U.S. EPA's Office of Pesticide Programs regarding Per- and Polyfluoroalkyl Substances (PFAS) in Pesticide Packaging. We are looking into your specific question, and will be back in touch.

As part of the U.S. Environmental Protection Agency's (EPA) extensive efforts to address PFAS, the agency is making new information available about EPA testing that shows PFAS contamination from fluorinated containers. Read EPA's press statement.

We hope the online resources referenced above offer useful information. Thank you for your patience as we look into your specific question.

Best regards,

*Office of Pesticide Programs
U.S. Environmental Protection Agency*

Subject: Containers of Duet

Hi,
My name is Henry Schwerner, M.D. and I'm a member of the Stockbridge, MA Board of Health. I'm writing to find out any information you have about PSAS contamination secondary to Mosquito Control by spraying Duet?
Thank you, Henry Schwerner, M.D.
